

Ego-network analysis with R (Part 1)

R basics

Raffaele Vacca, University of Florida (r.vacca@ufl.edu)

June 15, 2019

Contents

1	Overview	2
1.1	Data	2
2	Starting R and loading packages	3
2.1	Console vs scripts	3
2.2	Getting help	4
3	Objects in R	5
3.1	Creating objects: Basic concepts	5
3.2	The workspace	6
3.3	Saving and removing objects	6
3.4	Vector and matrix objects	7
3.5	Data frames	8
4	Arithmetic, statistical, and comparison operations	9
4.1	Arithmetic operations	9
4.2	Comparison operations and logical vectors	10
4.3	Basic arithmetic and statistical functions	13
4.4	Missing and infinite values	13
5	Indexing	13
5.1	Indexing and subsetting data frames	14
6	Pipes and the %>% operator	21
7	References	21

Ego-network analysis with R (Part 2)

One ego-network

Raffaele Vacca (r.vacca@ufl.edu), University of Florida

June 15, 2019

Contents

1	Overview	2
2	Ego-level vs alter-level data	2
3	Networks in R	5
3.1	The igraph package	5
4	Measures of ego-network composition	18
5	Measures of ego-network structure	24
6	References	31

Ego-network analysis with R (Part 3)

Many ego-networks

Raffaele Vacca (r.vacca@ufl.edu), University of Florida

June 15, 2019

Contents

1	Overview	2
2	Lists	2
3	Split-apply-combine with ego-networks	4
3.1	Composition: grouping and summarizing with <code>dplyr</code>	4
3.2	Structure: applying a function to every element of a list with <code>purrr</code>	10
4	References	13

Ego-network analysis with R (Part 4)

Appendix

Raffaele Vacca (r.vacca@ufl.edu), University of Florida

June 15, 2019

Contents

1	Importing data from csv files into igraph objects	2
1.1	Importing egocentric data with <code>egor</code>	2
1.2	Importing egocentric data with <code>igraph</code> and base R	9
2	More operations with igraph	19
3	The statnet suite of packages	22
4	Types and classes of R objects	26
4.1	Main classes/types of objects	26
4.2	Special and complex classes/types	27
4.3	Relevant functions	27
5	Writing your own R functions	29
6	A case study: Sri Lankan immigrants' embeddedness in Italian society	34
